

Mobile Apps - Test Build Installation Guideline

TestFlight (iOS) – Quick Start Guide

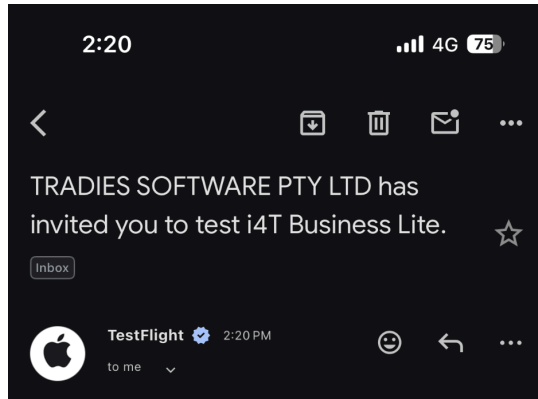

1. Install TestFlight

- Open the **App Store** on your iPhone or iPad.
- Search **TestFlight** and tap **Get** to install.

2. Accept the Invite

- You'll receive an **invite email**.
- Open it **on your device** and tap **View in TestFlight**.
- In TestFlight, tap **Accept**.

App Description

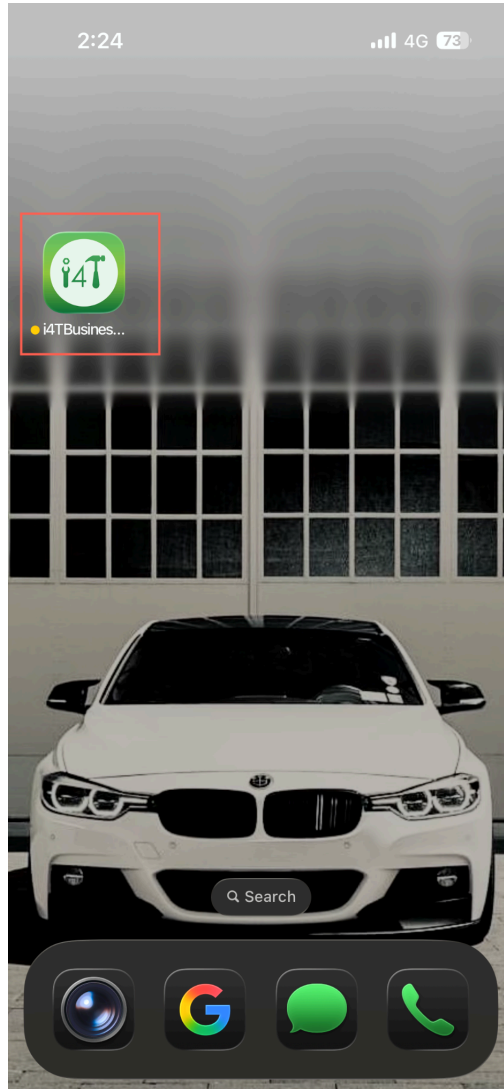

3. Install the App

- In TestFlight, find the app listed and tap **Install**.

4. Start Testing

- Open the app and use it as normal.
- The app will appear on your home screen with a small **orange dot**.

5. Keep Updated

- Versions expire after 90 days.
- TestFlight will notify you when updates are available → tap **Update**.

6. Uninstall & Reinstall (if needed)

- Press and hold the app icon and select **Remove App to Delete the App**.
- Open **TestFlight** again → tap **Install** to reinstall the latest version.

App Tester (Android) – Quick Start Guide

1. Accept the Invite

- You'll receive an email invite to join the beta program.
- Tap the link → it will open in **Google Play Store**.

2. Install the App

- In Google Play, tap **Install**.
- The app will appear on your home screen as normal.

3. Start Testing

- Open the app and try out the features.

4. Keep Updated

- Google Play will notify you when a new test version is available.
- Just tap **Update** in the Play Store.

5. Uninstall & Reinstall (if needed)

- Press and hold the app → tap **Uninstall**.
- Go back to your **invite link** or **App Tester enrollment page** and tap **Install** again from there.
